

HUBBA X4 GO

The new Hubba X4 Go marine broadband unit give high speed equivalent broadband speeds of up to 100Mbps up to 20 miles offshore via 4G, 3G and 2G networks.

The unit creates a WiFi hotspot onboard and also has Ethernet ports to support a wired network.

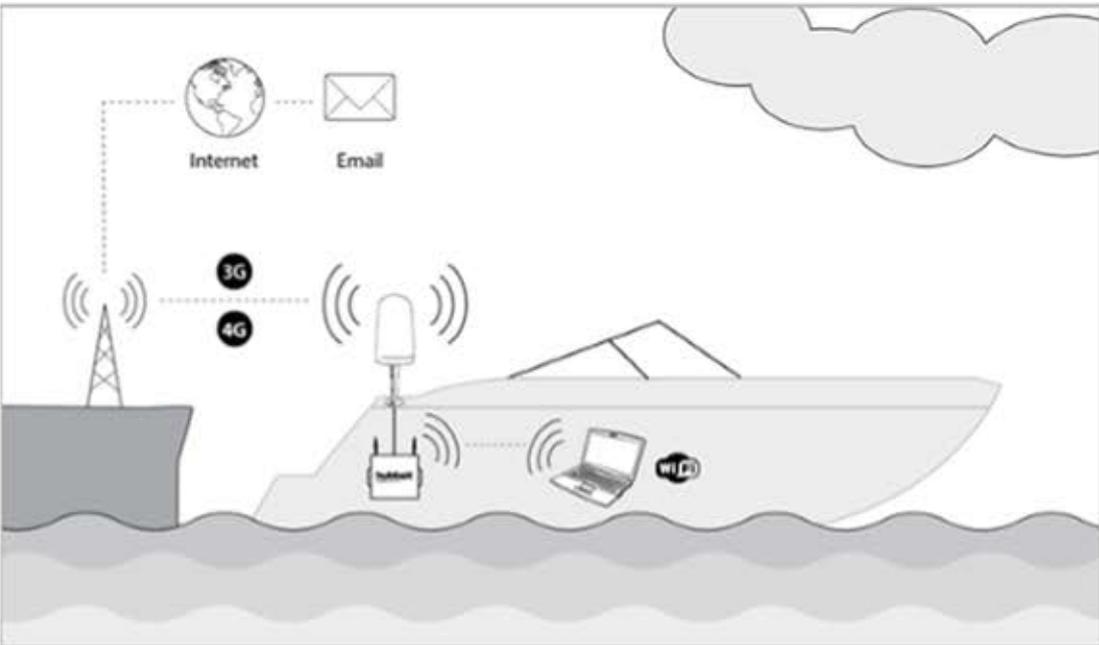

An external SIM holder allows for simple installation of a nano SIM.

HOW DOES IT WORK?

The Hubba X4 Go unit utilise 3G and 4G data networks, optimising access to coastal, land based networks and help extend the range and usability to the maximum distance providing an internet connection from your boat to shore.

Onboard it creates a WiFi hotspot allowing you to connect multiple devices or wired access via its Ethernet port.

Features	Hubba X4 Go
Antenna Waterproof Rating IP67	✓
WiFi IEEE802.11bgn	✓
12v DC Power	✓
24v DC Power	
240v AC Power	✓
1" Standard Antenna Mount	✓
Marina WiFi Repeat Mode	
Dual SIM Card Slots	
Max 100Mbps Downlink	✓
VPN Support	✓
Web Based User Interface	✓
Security: WEP, WPA, WPA2	✓
Auto Data Roaming	✓
Auto Fallback SIM1/2	

OUR ANTENNA TECHNOLOGY

Our latest MIMO antenna system, designed and built in the UK, to offer the best possible performance from an omni-directional antenna across the increased range of frequencies now available to mobile internet services and devices.

This antenna is the key to our solution and contains both transmit and receive elements meaning that there are two antenna cables supplied with each mini radome unit.

WHERE DOES THE UNIT WORK?

The X4 Go is designed for use primarily in the EU, Middle East and Asia as well as Pacific Rim countries. Please check for compatibility with other local network frequencies and network modes.

Hubba X4 Go

This single SIM powerful device comes in a bulkhead mountable IP66 rated enclosure with waterproof power and Ethernet connectors. It has status indicators and signal strength display and comes with our MIMO antenna system and two 8m cables.

This unit is ideal for vessels operating in one area or country and is the choice of many private owners as well as fleet operators.
